Summary of Meeting

Jim Brenner requested a meeting with CPSC staff to discuss Veritas' ATV ACE System Safety Study.

Representatives of Veritas and Rocket Pack described the extent of ATV use in Veritas' seismic data acquisition for the oil and gas industry and the four-year, 2.5 million-ridden-mile ATV safety enhancement program used by Veritas to reduce ATV fatalities and injuries. The ACE System incorporates training, the use of proper personal protective equipment, and speed limiting based on terrain and skill/experience level. Veritas believes that implementation of the ACE system could reduce recreational deaths and injuries.
